“it fits perfectly”

TIKA WOMEN'S PFD

The voices of an extensive focus group shaped the Tika's design. The tapered foam profile suits all shapes and sizes, with a wrap around fit like no other. Everybody who's tried it on tells us it fits perfectly. £1/1€ from each PFD contributes to getting more women on the water.

WATCH

Palm®

EDITO

The annual Paddler's Buyers Guide, produced by KS Publishing in collaboration with the Paddle Sports Show, the international paddle sports trade show, is the early January rendez-vous not to be missed for paddle sports gear-addicts worldwide.

With hundreds of product highlights, the gear pages reflect what was seen at the Paddle Sports Show and showcase what is available on the market in all segments of the paddle sports family, be it racing, sea kayaking, foil sports, outrigger canoes, kayak fishing, inflatable, whitewater, canoeing, stand up paddling ... You name it, we have it in some form.

On top of exciting new gear is an analysis of recent trends and predictions for the market evolution from the KS publishing editorial team and some of the finest industry professionals. They often see what is around the corner before most. Their informed perspectives help brands and end consumers consider current topics, helping to set the tone for what should happen in the coming years and shape a future the paddling industry is willing to work for.

Discussing market evolution and forecasting tomorrow's paddle sports trends are also goals of the Paddle Sports Show, which hosts numerous conferences, talks, and presentations alongside community gatherings and new products from industry leaders and upcoming brands.

This year, P2S—The Paddle Sports Show— saw a great wave of optimism despite the challenging economic situation of all industry players chasing the aftermath of the Covid boom. Sales may still be below predictions or all-time highs, but hope is the word.

"HOPE IN OUR CAPACITY TO MOVE FORWARD, TO WITNESS OUR SPORTS REACHING NEW LEVELS OF VISIBILITY, ACCESSIBILITY, AND IMPACT ON PUBLIC CONSCIOUSNESS."

Hope in our capacity to move forward, to witness our sports reaching new levels of visibility, accessibility, and impact on public consciousness. The hope needed to create industry-wide virtuous circles, making our production greener and reducing our environmental footprint. Hope for continued innovations in products and technologies. Hope to include even more people in the magic of paddling. Hope to help inspire the next era of evolution in our respective disciplines and industry as a whole.

We extend what has become the global paddle sports gear bible, the annual Paddler's Buyers Guide, to share the goodwill, optimism, and sense of community we felt so strongly in Strasbourg. These pages are, as ever, free of charge in the hope that they further spread the love and joy of paddle sports and highlight the efforts of those working so hard to secure our future.

If we took anything away from the show this year, it was belief in the power of our community. Trust in our ability to support each other. To challenge each other to do better. To inspire growth and change while holding true to our roots. Hope is the word, but community is our

foundation. We welcome all those who find their way to these pages to take part.

Visit the Paddle Sports Show in Strasbourg, France, next Sept 24-26th. You will be able to see this all live, participate in the future of our amazing industry, and help keep the water flowing. Let the adventure continue.

INTERVIEW: DAVID BAIN – NRS X PYRANHA

There was big news at the Paddle Sports Show this year, with NRS and Pyranha announcing a new strategic partnership combining sales and marketing initiatives to expand the impact of two companies at the forefront of the global paddle sports market. This partnership will see NRS' European sales, marketing, and customer service operations move to the newly expanded Pyranha headquarters in Runcorn, United Kingdom. The two brands will collaborate on customer service, dealer visits, field events, and marketing initiatives to better support their respective retail and outfitter networks. We met with Pyranha's new Commercial Director, David Bain, to learn more.

PG24: David, Pyranha and NRS recently announced an exciting new partnership that places you in a central role—congratulations. Can you tell us more about the motivation driving this decision?

DB: At the heart of this strategic partnership is the ability of both companies, NRS and Pyranha, to increase the effectiveness of our businesses and help retailers grow theirs. The opportunity for the two brands to work together in Europe allows us to offer the paddling community a gold-medal standard of customer service and availability alongside industry-leading product lines.

PG24: You have been NRS since its beginnings in Europe. What will your position be at Pyranha, and how will your new role impact your responsibilities with NRS?

DB: Whilst my title has changed from NRS European Sales and Marketing Agent to Commercial Director at Pyranha Mouldings, I have one job, and that is to support our team (which now includes a few key—and wonderful) people at NRS, our product lines, and our customers at Pyranha. My role as Commercial Director includes

**“BILL PARKS OF NRS AND
GRAHAM MACKERETH BUILT
COMPANIES FOUNDED IN
TEAMWORK AND A STRONG
PASSION FOR PADDLING; A
HOME TRUTH AND LESSON
THAT IS STILL HELD CLOSE TO
EVERYTHING WE LOOK TO DO.”**

overseeing this strategic partnership, and the obligations that Pyranha has. I'll continue working closely with NRS USA to maintain the global vision for NRS and guide NRS Europe with the support of Pyranha's dedicated teams of paddle sport-loving people.

PG24: There is no better person to take on this role, given your experience in the industry and longstanding relationship

with both companies. What are your thoughts on the partnership and what it can achieve?

DB: Thanks for the vote of confidence! I certainly think the partnership is a smart move; bringing these two leading companies together is too good an opportunity to be missed. It's an exciting new chapter, and I'm thrilled to take on the role of Commercial Director and continue working with two brands that have known me since the age of 15. It's nice to think I have something to offer both Pyranha and NRS and can help make this partnership possible. What lies ahead is incredibly promising, and I am genuinely excited about the future of paddle sports. More people are embracing the water than ever before, and working with two companies

that will help shape that future is a privilege. With that said, this partnership is about much more than the excitement or vision of any one person.

PG24: What is the single biggest advantage you see to this strategic partnership?

DB: Expanded teams of experienced and dedicated paddle sports lovers in charge of customer service, sales, and marketing, all operating within the European time zone, focused on the needs of the European market. We hope this additional support gives retailers the confidence to work with NRS and Pyranha to support their businesses and commercial success. Anything else that happens along the way is all good and part of the adventure.

PG24: Will some of the Pyranha staff now be working for NRS, or will NRS customers be working with Pyranha staff?

DB: Pyranha will provide all the support services traditionally required, overseen by me. We have made team adjustments to accommodate this and improve the buying and selling experience for existing NRS customers.

PG24: Will NRS and Pyranha also be sharing distribution channels or collaborating on other initiatives?

DB: No, there is no distribution arrangement. NRS and Pyranha will continue to send products through their own channels, and NRS will continue to store and distribute products out of the Netherlands. The partnership only extends to aspects that involve communications, relationships, and building reliability for our customers: Sales, Marketing, and Customer Service activities. Again, the distribution of the two companies and the invoicing remains completely separate.

PG24: What will be the added value for end consumers and paddlers?

DB: By improving our availability, communications, and service, retailers will be better positioned to support the end consumer with the Pyranha and NRS products they love. Of course, we also love to attend events and spend time on the ground —after all, most events involve paddling—and hope to support as many as possible, the real benefit to paddlers on the ground will be led by our retail and commercial partners.

PG24: Will this collaboration increase access to new markets?

DB: Both NRS and Pyranha are committed to supporting our vast network of existing retail outlets, be it within the outdoor recreation, specialist paddlesport enthusiasts, or commercial use markets. Retailers are the foundation for a strong industry, and our support is unwavering. That said, we know there are areas where we can improve our distribution through availability and product suitability, and of course, evolving how we support these key geographical and market areas is critical for the future.

PG24: Is there a chance we'll see NRS distribute Pyranha products in North America in the future?

DB: Pyranha US has been hugely successful, and is an integral part of Pyranha's business. Chris Hipgrave, Mike Patterson, and the entire US team have been key to this success. We don't see any changes to our US distribution in the pipeline— although we have some hugely exciting developments led by Pyranha US for Canada, which will make boats far more readily available to the paddlers we know have been longing for our Pyranha and P&H ranges.

PG24: How do you see the values of Pyranha and NRS aligning, historically and in terms of goals for the future of the European paddle sport market?

DB: NRS and Pyranha, while many miles apart, have many similarities. Bill Parks of

NRS and Graham Mackereth built companies founded in teamwork and a strong passion for paddling, with an ethos to create industry-leading products and put the community first. This home truth is still held close to everything we look to do. Both companies are always looking to improve the sport for the people in it, including the NRS and Pyranha employees who enjoy their spare time on the water. Both brands already serve retailers across Europe, and share the goals to always support customers to the best of our ability and bolster the industry with community empowerment and the very best products on the market.

PG24: NRS and Pyranha have traditionally promoted sustainability initiatives, community events, and environmental non-profits. Will this remain a focus in the future?

DB: Absolutely. Supporting NGO partners, be they environmental or community-focused, is supporting the industry we love. Whilst cash injection is incredibly important for NGOs to operate, the partnership will also allow us to use our vast communications channels to amplify our partners' messages, hopefully allowing them greater impact and success with their goals.

PG24: So, what is the plan for 2024? What is the long-term goal for NRS, Pyranha, and for this new partnership? How do you feel about the future?

DB: The last few years have been a rollercoaster for our industry, with highs and lows. We see a bright future, though, with a strong industry that we are grateful to be part of. This dynamic environment is what makes working in paddlesports exhilarating. As we enter the 2024 season, Pyranha and NRS will continue launching groundbreaking products—lots are in the works already!—and using this partnership to improve paddler experiences and enjoyment on the water and off.

PG24: Is there anything you hope to achieve as Commercial Director?

DB: As Commercial Director, my attention is consistently directed towards creating a business that enhances the overall experience of those who spend time on the water in our products and contributing to the growth and sustainability of our own business, and the paddle sports industry as a whole. My core

focus remains supporting Pyranha in all we do, while looking critically at how our business can actively support and contribute to the paddle sports community, whether that's overseeing the success of this partnership, collaborating with non-profits to dismantle entry barriers within our sport, engaging in environmental initiatives, participating in events that ignite enthusiasm within the industry, or crafting a diverse range of products to meet the varied needs of paddlers.

PG24: Does that mean you are on the hunt for new staff?

DB: The hunt, maybe not, but we are always keen to hear from people who want to partner or work with us, from a young ambassador, which is where I began with both brands, to anyone who feels like the paddle sports industry is the right place for them and their future. You know where we are.

“AT THE HEART OF THIS STRATEGIC PARTNERSHIP IS THE ABILITY OF BOTH COMPANIES, NRS AND PYRANHA, TO INCREASE THE EFFECTIVENESS OF OUR BUSINESSES AND HELP RETAILERS GROW THEIRS.”

ONE STEP CLOSER: CREATING A VIRTUOUS CIRCLE

Can paddle sports create a dealer-based system where used and end-of-life gear are recycled into usable materials?

For all our efforts toward sustainability, the paddle sports industry exists alongside an ugly truth. We leave a massive environmental footprint, from plastic waste and carbon emissions transporting and manufacturing goods to products whose life cycle ends, more often than not, at a landfill. Rather than accept this as fact, more are asking: What are we going to do about it?

Production and design

This year at the Paddle Sports Show in Strasbourg, there was growing interest in creating an effective "virtuous circle," with brands and dealers uniting to discuss pathways to recycle end-of-life products into raw materials, which can be used to create new items for purchase. Topping industry-wide advances in sustainable construction and design was Peak Paddlesports' "Circular Ready" line and concept, products designed to be deconstructed and returned at the end of life to usable raw materials rather than a landfill. It's an exciting taste of what the future could hold.

Collection and processing

One solution to facilitate recycling end-of-life products involves dealers as intermediaries who can collect and return items to manufacturers or send them to exter-

nal partners. Discussion at the Paddle Sports Show made it clear that placing the dealer in a central role adds value for manufacturers and dealers alike. In addition to strengthening existing networks and relationships, a dealer-based solution has the potential to drive sales and encourage repeat business as customers return used products and buy new ones. Additionally, the more participation in such a system is celebrated or rewarded, the more not partaking risks damaging reputation and sales.

"THE QUESTION IS NOW LONGER HOW MUCH THE EXTRA COST WILL BE... THE QUESTION IS HOW MUCH LONGER CAN WE—THE PADDLE INDUSTRY—ESCAPE OUR RESPONSIBILITIES?"

"Consumers increasingly value longevity and eco-resilient manufacturing processes and materials and recognize the detrimental environmental effects caused by products that routinely need replacement," points out Jason Eccles, President of Aqua Bound and Bending Branches. This realization has led to new technologies for Aqua Bound, including their Lam-Lok™ blade construction, as seen in Strasbourg.

RTM & Dag Kayaks have been recycling old boats and plastics wastes for some years now, as have others in the industry.

Another benefit to using established dealer networks is an accelerated pathway to reduce plastic waste. Introducing reusable transport bags for boards and kayaks that can travel between dealers and manufacturers or be used to collect products for recycling "could reduce plastic pollution by five kilos per kayak," asserts Bob Timms, who helped lead and organize the "The Virtuous Paddle Sports Recycling Chain" conference at the 2023 Paddle Sports Show.

Brands such as Rab, The North Face, and fashion giant H&M have initiated similar systems with take-back boxes available at limited retailers. Others, like Teva, accept products via mail, covering the cost of shipping to recycling partners or rewarding customers with credit towards future goods. "Lots of (paddle sport) manufacturers have these initiatives, but they're not being recognized enough," points out Lotta Lettmann.

Currently, Peak's Circular Ready line can be returned to Peak Paddlesports in person or via mail. Peak will separate the components and send them to their recycling partners for processing. Many kayak companies, such as RotoAttivo, Lettmann, and Liquid Logic, offer recycling options for boats made of LDPE and HDPE. "Not Sure What to Do with Your Trashed Boat? Let Us Recycle it!" exclaims Liquid Logic's website. "Return your old kayaks and canoes to Roto. We can recycle them and produce new products. You will save nature and receive discounts," promotes Roto.

Still, "most paddlesports products are currently not easily re-purposed by the manufacturers," reminds Palm Equipment Marketing Manager Paul Robertson. Rather than having manufacturers invest in building facilities, partnering with third parties who can help separate parts and transform them for their next phase of life seems prudent—and a great place to start.

Further inspiration can be found in the success of ski giant Technica, which has collected and upcycled more than 4000 pairs of ski boots since launching the "Recycle Your Boots" program in 2021. Retailers played a crucial role in Technica's success by raising awareness of the campaign and collecting boots, later delivered to a collection center in Italy via a dedicated transportation system. The collected boots are broken down into useable raw materials and sent to different partners for use in various products, from ski boots to crash pads.

A perfect solution? Maybe. Maybe not. Having manufacturers cover the cost of recycling or transportation to recycling centers effectively gives dealers larger margins. However, fully shouldering the cost of getting heavier, bulkier items to appropriate recycling facilities "would raise the price and drive down profitability or make some items less desirable," cautions Miha Rausl of Sipa Boards. The burden on the manufacturer could be significant, especially considering the potential added cost of sourcing recyclable materials and modifying product design without sacrificing quality. Creating incentives and making the system as convenient as possible remain important, from facilitating collection networks to reduce the cost of transporting and processing goods to convincing consumers to pay more for items that do good and manufacturers to take responsibility for the lifespan of their products.

But make no mistake. The question is no longer how much the extra cost will be, nor is cost an excuse. The question is how much longer can we—the paddle industry—escape our responsibilities? The Earth is at a critical juncture. Even with advances in sustainable materials and support for environmental initiatives, the paddle industry's impact on the planet is undeniable, and people are starting to notice. We need to initiate change now. Before our "ugly truth" and environmental impact drive customers away or turn them against us. Before we no longer are seen as promoting and protecting the outdoors but polluting them. Before we are seen not as proactive, but as unable to act.

"MOST PADDLESPORTS PRODUCTS ARE CURRENTLY NOT EASILY RE-PURPOSED BY THE MANUFACTURER."

The ultimate goal is to create a true virtuous circle, where everything we produce is 100% "green," made from sustainable materials that can be recycled and repurposed so that nothing ends up in a landfill. It is not as impossible as we think. The industry has already taken steps toward reaching this goal as individuals. The next step requires collective effort and a strong network of dealers and manufacturers. It's a big job, but the first step is to start. The cycle may evolve as we develop new technology, but we will always need to finish what we started and take ownership of our mess. There is no alternative for the planet or the paddle sports industry. Who's in?

FROM BIG WATER TO THE BIG TIME

With increased visibility for paddle sports in mainstream arenas comes surprising new opportunities and potential.

Lately, paddle sports are visible everywhere you look. Celebrities do it. Paddleboards, kayaks, and canoes feature in advertisements ranging from trucks and alcohol to life insurance and financing family vacations. Instead of needing a specialty store, entry-level products are sold at the supermarket.

It's undeniable that paddle sports have reached the mainstream, becoming synonymous with an adventurous lifestyle. It's a development that benefits the entire industry. The more visible paddle sports become, the more paddling culture seeps into the public consciousness, laying the foundation for good things to come that go far beyond participation numbers alone.

"We have the interest of the masses; now we need to convert that interest into passion," says NRS CMO Mark Deming. For Deming, passion doesn't need to dominate a user's outdoor life. Even holding one-third of a person's time, attention, and budget places paddlesports in a position to compete with snow sports, cycling, climbing, backpacking, etc. "Essentially, our job is to make paddling a third of an outdoors person's recreational mix, a third of their garage or gear closet, a third of a person's spending on gear."

With paddling's increasing popularity and visibility comes new avenues for revenue and the chance to broaden brand reach with crossover and lifestyle goods, from base layers to accessories and changing ponchos. According to *The Daily at Outdoor Retailer* in February 2023, while hard goods sales are down, sales of water sports accessories such as booties, helmets, gloves, and hoods are up. Dry gear sales also showed a significant increase, combining for millions in sales.

Just as boardshorts brought surfing's sun-soaked, laid-back style to the larger world, items iconic to paddling culture, whether sun hoodies or dry bags, are finding homes on dry land. Take Teva, whose flagship sandal originated on the Grand Canyon of the Colorado River, and who used the ethos "freedom to roam" to become a globally-recognized footwear brand. With surf companies like Roxy and RipCurl successfully bridging the gap between core surf culture and mainstream fashion, it stands to reason that paddling brands are poised to do the same, selling not just technical gear but paddling lifestyle and culture.

It's not just paddling; the entire outdoors is having a mainstream moment. Fleece has become fashionable. Metal water bottles are everywhere. Gucci collaborated with The North Face, and Prada recently partnered with Red Bull (who has their own fashion label, Alpha Tauri) to make whitewater kayaker Aniol Serrasolses' descent of waterfalls flowing off the Svalbard glacier possible—a feat shared on major international news channels.

As mainstream news, Aniol's feat inspired awe on a global scale. The Svalbard Project, which was partly inspired by climate change and the rapid melting of the glaciers, showcased another benefit of mainstream exposure. The more people see paddling, the greater the platform for the environmental issues our waterways face, whether or not that exposure drives people to paddle or drives sales.

"THE MORE VISIBLE THEY BECOME, THE MORE PADDLING CULTURE SEEPS INTO THE PUBLIC CONSCIOUSNESS, LAYING THE FOUNDATION FOR GOOD THINGS TO COME THAT GO FAR BEYOND PARTICIPATION NUMBERS ALONE."

As exciting as it is to see missions like Svalbard featured on mainstream news channels, the extreme side of paddle sports is often more intimidating than encouraging. To truly capitalize on this exposure and drive more people to try paddle sports, we need subtler, smaller promotions that make anybody feel they could enjoy a day out on the water—no glaciers needed. Getting everybody, anybody, to think about trying paddle sports will be the true mark of making it to the mainstream.

While some still confuse "paddle sports" with pickleball, we've come a long way. The foundation is there for continued growth, and it's hard not to be optimistic about the future. Our community is growing, welcoming a wider variety of users. Our gear is improving in comfort and technical performance, and our exposure is helping more people than ever realize paddling exists—and it's fun! Sure, no matter how many advertisements feature paddling, the inherent risk of watersports means it may never be seen as accessible as hiking or biking for the majority of outdoor enthusiasts, but this isn't necessarily a disadvantage.

The allure of paddle sports lies in the spirit of exploration, celebrating the beauty of nature, embracing the freedom of the outdoors, and connecting to something bigger than ourselves. With only a few strokes, paddling takes you truly somewhere different, allowing access to the heart of nature even in the midst of a major city. It's why paddling—SUP, sea kayaking, whitewater, even casual touring—now often stands in for the idea of adventure rather than hiking, biking, or even surfing.

Whatever comes of our increased visibility, be it more paddlers, new opportunities for revenue, or global brand domination, to be an accepted, normalized outdoor activity promoting a passion for the outdoors while empowering adventure and the protection of our wild places in the public sphere is a milestone worth celebrating.

At NRS, you'll find passionate rafters, whitewater kayakers, sea kayakers, stand up paddlers, kayak anglers and fly fishermen whose lives and livelihoods are intimately connected with water. Our future depends on healthy waters where our customers and we can recreate, recharge and reconnect with nature. With that being said, we realize that access to paddling is a privilege and that too many people around the globe either do not have that same access or do not feel welcome to recreate on our public lands and waters. Beyond fighting to keep our important places wild and free, we've also committed to breaking down the barriers to the outdoors, in hopes that our important places are truly enjoyed by all. This is a long-term, sustained effort aimed at building strong, durable relationships with those out there doing the hard work to make lasting change. We're proud to work with a growing group of people and organizations, to continue to hold ourselves accountable and keep integrating these stories into the fabric of our company and community.

EMBRACING E-VOLUTION

With more options and better paddle-assist technology, there couldn't be a better time for paddle sports to embrace the E-revolution.

Paddle sports have long given a way to be in nature's thrall, to find that magic moment where all that matters is your next stroke. When it is just you and the water, the only sound a huff of breath and the echo of a paddle's cadence. Lately, there is a new sound: a gentle hum and buzz as paddle sports rapidly embrace an E-revolution.

The growing interest in paddle-assisted technology was evident this year at the 2023 Paddle Sports Show in Strasbourg, France, as increasing numbers of brands joined established pioneers in exhibiting refined designs for motors large and small. Czech company eMOGI showcased the recreational and rescue benefits of their composite Aluki kayak. F-One debuted their new e-fin and spoke of developing technology that would allow the motor to gauge when assistance was needed. Bote Boards blend the power of a motorized fishing boat with a stand-up paddleboard feel in their Micro Skiff line, while Native Watercraft's award-winning Propel TitanX comes "electronic-ready," recognizing that the ability to add a motor makes kayak fishing accessible for even more anglers.

Brands such as Take Outdoors, Coastco, and SIPA Boards have long recognized the potential of motorized paddleboards and kayaks and have already put work into developing innovations. As electric technology continues to improve, this corner of the market will only grow, bringing greater versatility, appeal, and adaptability to all paddle sport disciplines. Among those set to benefit most? The young, the elderly, and those who lack the skill or fitness to handle the physical demands of paddling, from changing conditions to upper body strength.

"If {motorized paddle sports} democratizes paddling and allows people of different ages, abilities, and fitness levels to enter, participate, and grow their skill sets," says Miha Rausl of Sipa Boards. Paddle-assist technology makes hauling gear or kids easier and enables safer and more enjoyable paddling experiences for people with disabilities or limited mobility, including older adults. This increased accessibility provides a critical access point as the industry looks to diversify further, targeting those who currently find paddling too difficult or daunting.

"I think it {paddle-assistive technology} can be a good upsell or add-on and bring in more users and new customers into the sport for sure, especially those willing to spend more for more luxury and convenience on the water," says Graham Ketcheson of Kayak Distribution. Given battery systems can cost as much as a boat or board, paddle-assistive technology is a much-needed boost when sales are tough.

"If it makes being self-powered less intimidating for people to get into it {paddle sports}, I see it as a plus," says Jackson Kayak Marketing Director Emily Jackson. It's worth remembering that not all users need to purchase boats or boards. The higher cost and current novelty factor of motorized paddle sports may drive business to rental shops, tour services, and retailers.

"In the US, e-bikes are outselling classic bikes by huge margins," continues Miha. "A little bit of boost can make a huge difference and with uphill cycling now becoming a thing for families, the industry is starting to boom." Equally intriguing are

"AS ELECTRIC TECHNOLOGY CONTINUES TO IMPROVE, THIS CORNER OF THE MARKET WILL ONLY GROW, BRINGING GREATER VERSATILITY, APPEAL, AND ADAPTABILITY TO ALL PADDLE SPORT DISCIPLINES."

opportunities for those looking to go further or faster. For the fitness-inspired, the power boost doesn't change how hard you work, only how far or fast you can go within a given timeframe.

Despite the versatility and appeal, conflict in the cycling industry indicates that not everyone is equally entranced. For all the advantages, e-powered paddle craft detracts from what many feel lies at the heart of their paddling discipline: A retreat to nature, the ability to be truly present, to connect with the elements.

"For Starboard, our core and focus is on using the energy of the wind, wave and your own strength to promote an active lifestyle. We have not moved into E-drive related products as it doesn't fit with our core principles and we feel it detracts away from the authenticity of our sports," explains Starboard SUP Brand Manager Ollie O'Reilly.

Though e-technology will attract new users, more paddlers also mean a greater impact on our waterways and access points, whether trash, noise, or crowds. Other concerns center around the experience of other users and environmental impact. An advantage of non-motorized kayaks and paddleboards is the ability to navigate sensitive ecosystems with minimal disturbance and harm to aquatic environments.

Whether the joy paddle sports bring feels compromised or complemented by electric-assisted technology, it won't go away any time soon—or at all. Rather, expect innovations in user-friendly designs, lighter-weight materials, and longer-lasting batteries. As e-technology improves, it will continue to drive interest in paddle sports, bringing much-needed numbers and a broader range of participants. However, as numbers grow, so does the need for infrastructure and education on best sport practices so that making paddle sports more inviting doesn't isolate those already here.

All are entitled to time on the water, no matter how they access it. Making paddle sports accessible and enjoyable to as many as possible should always be the ultimate goal. In this sense, E-technology is a gift we are ready to embrace.

INVEST IN THE FUTURE

Rather than dismiss youth gear as “not cost-effective,” brands are realizing that making paddle sports accessible to kids is worth the risk.

Want a sport or habit to stick? Start young. Or so the saying goes. How many out on the water wish they had been introduced to paddling earlier? Ironically, ask those who began young about their early days on the water, and you'll likely hear “cold,” “awkward,” and “uncomfortable.”

Generally speaking, the kid's market has been considered too small, too risky, and not cost-effective enough to merit significant attention or development. Few parents were willing to invest in expensive, specialized items for children that would outgrow them quickly. Rather than bring their kids on the water, many let paddling fall by the wayside in favor of more “family-friendly” activities.

Recently, that has begun to change, with more brand owners becoming parents and families flocking to paddle sports in search of a fun outdoor activity for the whole family. More, an entire generation of active paddlers are becoming parents who want to share their passion with their kids—and they need gear to do it.

Call it selfish or smart; you don't have to be a parent to realize this is a market worth investing in. “Our growth and future depend on youngsters getting into the sport. The products they're using play a huge part in their first impression and experience,” acknowledges Lotta Lettmann, the third generation of a paddling family and Marketing Manager for Level Six. Paddlers know paddling is a great way to create core memories and explore personal limits and new destinations. Parents know a happy kid equals a happy parent. Gear that is comfortable and fits well goes a long way toward facilitating fun on the water, making everyone more likely to want to repeat the experience. “I think having gear that fits makes parents more comfortable taking kids on the water,” says Jackson Kayak Marketing Director and mom of two Emily Jackson.

While most youth will start by sharing a boat or on the board with parents, investing in equipment kids can paddle themselves adds to the fun and is critical for skill development. “Offering gear better suited to children/smaller paddlers encourages independence and participation from a young age. In seeing my four-year-old son's

“AN ENTIRE GENERATION OF ACTIVE PADDLERS ARE BECOMING PARENTS WHO WANT TO SHARE THEIR PASSION WITH THEIR KIDS—AND THEY NEED GEAR TO DO IT.”

eyes light up when he first held a 'tiny canoe paddle,' I witnessed a shift in his realization that paddling is something he can actively engage in, says Luanne Koubsky, Creative Lead at Aqua Bound & Bending Branches.

Consider bikes and skis: Starting your kid out with a too-big bike or ski boots/skis is so clearly detrimental to having a good—and safe—experience it is laughable. Given the number of bike and ski companies with successful youth-specific lines and the increasing willingness of retailers to diversify youth offerings, it is almost surprising there aren't already more options in paddle sports. After all, kids are the perfect target audience. “If not children, then who is athletic and adventurous?” asks Lettmann.

At the 2023 Paddle Sports Show, Soul Waterman founder Corran Addison showed off videos of his son ripping in his latest whitewater kayak design. Aztron's Tony Yeung debuted an inflatable youth racing SUP. There were kid's carbon fiber surfskis at Vadja and numerous other advancements. But youth equipment doesn't need to be ultra-elite or performance driven. “Parents mostly just want to know their kids are happy, are not exposed to huge risks; and that they are getting good value. Kids want to just have fun,” says Palm Equipment Marketing & Brand Manager Paul Robertson. “Simple, functional products,” agrees Jackson. “Medium-end is key.”

Durability and price point are crucial factors in making paddle sports accessible for families. Developing trade-in programs or gear that can grow with kids reduces the perceived cost and extends use over multiple years. Items hardy enough to hand down or sell when they no longer fit also help make investing in kid's gear less risky and more cost-effective for manufacturers and consumers alike.

“Kids kit isn't just a short-term growth strategy, it's hugely important for us all to ensure there are future participants,” reminds Robertson. Kid-specific gear lets the next generation improve at paddling much quicker and at younger ages than before, creating a healthy—and hopefully long-lasting—relationship with a brand and a love of paddle sports. It also lets the industry maintain the paddlers that are already here. “It's 100% worth the investment even if the return on investment might not be realized for a decade to come,” agrees US Sales Director Chris Hipgrave.

There is no shortage of young guns out there ripping already. At Peak Paddlesports, what started as a niche desire to share the river with his kids has evolved into something much more for founder Pete Astles. “Hopefully, these youngsters will become lifelong paddlers. Some will be future champions and river advocates, and some will become parents themselves, perhaps continuing the paddling circle for another generation.”

ONE STROKE AT A TIME: *THE SLOW(ER) BUT STEADY BEAT OF SUP*

An oversaturated market and overstocked shelves won't last forever. SUP sales are slowing, but SUP is far dead.

Over the past twenty years, SUP has taken the paddling world by storm, growing exponentially and attracting countless enthusiasts. Every year, there were more manufacturers, paddlers, and interest. It seemed too good to be true, and we knew it wouldn't last forever. Sure enough, SUP's meteoric rise slowly imploded in the wake of a Covid boom, leaving dealers overstocked and the market oversaturated. But don't be fooled into thinking this is the end. While things have slowed, they have not stopped.

Like the rest of the industry, SUP brands are experiencing overstock due to Covid-induced production lags, a situation compounded by the overwhelming market saturation of entry-level boards, particularly inflatables. Yes, boards are still selling, but smaller margins and reduced prices through retailers like bigger box stores and online discounters. Increasing shipping, storage, manufacturing costs, and anticipated outcomes of the Ukrainian war and inflation further reduce margins, falsely equating less profitable with less popular.

If you look to the water, SUP appears as in demand as ever. The hypothetical debut of SUP racing in the 2028 Olympic Games has fostered the growth of clubs and developmental programs and encouraged more brands to invest in developing racing boards for amateurs and professionals. The 2023 ICF World Championships in Thailand had nearly 1000 paddlers participate, showing a thriving racing scene. The ISA Worlds also had a great turnout of new and familiar faces, as did events such as the 2023 edition of France's GlAGla Race, which attracted hundreds of paddlers, amateur and pro alike. The Molokai to Oahu numbers were up in 2023, accompanied by growing interest in SUP foil downwinding. On the surf front, seeing a SUP or two or three in the lineup at nearly any break worldwide is not even a little surprising.

"MARKET PREDICTIONS SHOW PADDLEBOARDING CONTINUING TO GROW AT RATES BETWEEN 8-10% OVER THE NEXT 5-10 YEARS."

For casual recreationalists, SUP retains its reputation as the friendliest paddle sport, versatile enough to use in more urban areas or escape crowds and head deeper into the wilderness. Despite the oversaturation of entry-level products, sales are slowly creeping back up. "Personally, we have noticed an increase in sales in the medium-low range," says Massimo Vanzin of FreeBie SRL. Others note increased interest in hard boards or more specialized designs.

Adding foil-specific products to manufacturer lineups has generated fresh interest in multiple SUP disciplines, from downwinders to riding waves. Foiling's popularity might serve as a bridge and lure users from other surf and wind sports, such as surfing, windsurfing, and kite surfing, to enter the market.

SUP is also taking off in regions outside of Europe and North America. In addition to rising interest in China and India, a 2023 report on skyquest.com identified Japan and Indonesia as the fastest-growing markets between now and 2030. "We definitely see emerging markets in Asia on the rise," agrees Starboard Brand Manager Ollie O'Reilly, pointing out that the recent ICF World Championships in Thailand, China had over 100 paddlers competing; Indonesia secured a gold medal in the junior men's category, and competitors from India, Singapore, Korea, and Japan attended. China, in particular, is pushing to encourage people to get into SUP, a strategy paying off already, with over 1,300 participants in a recent race.

Having a plethora of boards available for cheap may even prove beneficial in the long run. "Buy cheap, buy twice" is becoming a more widely adopted strategy as SUP looks to exploit an oversaturated market. "Stock will clear out and the industry will remain about 20% bigger (in terms of users) in comparison to pre-Covid," posits Miha Rasul of SIPA boards. Many of these customers will slowly start buying better products, giving the brands that survive this phase a chance to compete in developing further innovation and building brand capital.

"As manufacturers, we need to reignite demand through innovation," says Mark Deming of NRS. Recent advancements in inflatable technologies have already led to stiffer, lighter boards shaped for performance. "With woven drop-stitch materials, like NRS Z-Blend, and new manufacturing techniques, designers can work in three dimensions to create unique board profiles with specific performance characteristics," explains Deming. Innovations in technology and design, such as NRS's v-shaped hull, give the avid paddler a reason to upgrade while widening the gap between generic price-point SUPs and high-quality, high-performance boards.

Finding success in SUP has become a marathon rather than a sprint, and some brands may not survive the transition. It will take a splash of luck, a solid brand identity, active brand communication with support for athletes and events, and innovative products. But for those that do, the future is still promising. While the exact figures vary, market predictions show paddleboarding continuing to grow at rates between 8-10% over the next 5-10 years.

After all, with prices this low, there's never been a better time to try it.

DEALER PROFILE - KANUSCHULE VERSAM, SWITZERLAND

Located in the majestic "Swiss Grand Canyon" on the banks of the Upper Rhine River, Kanuschule Versam is a shop, kayak school, and rafting company. Currently celebrating 35 years in business with three passionate Swiss paddling legends behind the wheel - Marcus Keller, Kasi Felman, and Toro Rogenmoser - Kanuschule Versam is a leader on the European paddling scene. We talked to co-owner Toro Rogenmoser to learn more about KSV's ongoing success.

PGmag: You celebrate 35 years in business this year. Congratulations! How does it feel to have succeeded in your initial dream of making a living from your passion?

Toro Rogenmoser: It feels great. It's 35 Years for KSV but 25 for me; thanks for reminding me to celebrate!

PGmag: KSV is in Versam, Switzerland, near Ruinaulta on the Rhine River. What drew you to this location?

TR: The founders came here because of a great river, awesome scenery, and the unique opportunity to do train shuttles, which allows kayaking to be less motor-reliant.

PGmag: We hear the three of you still paddle all year round. Is a passion for paddling the recipe for success?

TR: Yes, we still paddle all year round, but to varying degrees. I think the recipe is to be deeply embedded into what you do: Try to be better at it every day. Know the field, know what's happening. Being passionate doesn't mean you HAVE to be on the water all the time. And focus on a specialty. For us, it's whitewater.

PGmag: Describe the nature of the Kanu Schule (kayak school). What is the spirit your programs aim to develop?

TR: We focus on whitewater kayaking and canoeing. It's born out of our hobby, and our love for the sport is also the spirit communicated. We try to teach students to be safe, passionate, and caring.

PGmag: What is the rough percentage split between all three activities—kayaking, canoeing, and rafting—in terms of revenue?

TR: Roughly, all three parts are similarly big. The difference lies more in how the revenue relates to other parameters. For example, the shop takes the biggest upfront investment (inventory), and the school needs the most human power, aka teachers. But we look at the overall package, not single numbers.

PGmag: Why did KSV expand to include a retail shop? Was it a financial necessity or a more service-driven initiative?

TR: The retail store opened in 1994, so that was a bit before my time, but it grew naturally from buying gear for ourselves to having a few items for our customers.

It started with a handful of items and slowly grew because it made sense. One constant challenge: our available space seems to grow more slowly than the inventory...

PGmag: Have you seen any lasting changes in interest and business since Covid?

TR: Overall, we are back to—quite exactly—pre-Covid, which started with a big spike in online sales during lockdowns, followed by a peak summer for rafting and courses when people could not go abroad. With the shop, we have to manage a bit of overstock. We also now stock up record-early, an holdover from when we were sold out of many items and manufacturers were, too.

PGmag: How do you approach online sales? Do most customers ship products or pick up their orders at the shop?

TR: It's around 50/50 overall. In winter, it shifts to 99% online with shipping. We are basically located on the riverbank of one of the Rhine's most paddled sections in Switzerland, so we are the drive-in of kayak shops. We even put a plastic floor in the shop because paddlers often come in dripping wet!

PGmag: Who is your clientele? Are the demographics the same for the shop, rafting business, and kayak school?

TR: Overall, we have mostly Swiss clients. Interestingly, this is also true for rafting. Our rafting clients are people of all ages, individuals, companies, and clubs/associations. In the School, we have a gap between the ages for youth camps and when young people can pay for a course themselves. Maybe it's also the age where one feels most adventurous and ready to learn by trial and error.

"I PREFER A LONG(ISH) DRIVE TO A SHOW TO SEE EVERYTHING IN ONE PLACE OVER REPS COMING TO OUR PLACE TO PRESENT NEW PRODUCTS."

PGmag: Do any recent innovations excite you?

TR: For me, there's a stark contrast between the development in boats vs. gear. For boats, there's the shift in the predominant type/discipline to the current half-slice craze, but also big trends and changes within the disciplines, which really are exciting. But I am disappointed with the development of gear. The dry suit took over, but apart from that, I mainly see fashion-type

changes rather than technical improvements. That may help something sell better, but it makes it harder for shops. Slight changes and fancy new names for colors and color schemes make for a lot of unwanted work in inventory and web software. I am more interested in practical features: Safety/visibility, wet-weight (how heavy am I after a swim?), durability, usability; these innovations may exist but aren't being promoted as much.

PGmag: We've seen you every year at the Paddle Sports Show and for 15 years before that at PaddleExpo. Will we see you again in Strasbourg?

TR: You will. Tradeshow are important. I prefer a long(ish) drive to a show to see everything in one place over reps coming to our place to present new products. I also like the social part of meeting people from the business and people I used to see in eddies. It's important to us to have one show, and not several different ones. We're happy that our entire whitewater niche is represented in one show.

BOARDS

Every day, more people worldwide hop on boards and head out to enjoy the water. From fitness to family fun, surfing waves to racing long distances, stand-up paddle boarding has a broad appeal to anyone looking to access rivers, lakes or oceans. Today, boards are made using various materials, from PVC and rotomolded plastic to coconut husks. Innovations in inflatable technology have only increased the appeal and versatility of paddle boards allowing even those in urban environments to easily access the water.

NRS - JUKDO 100

The Jukdo SUP Board gives the do-it-all paddler a premium board intentionally designed to track on flat water with the maneuverability to handle light surf and river running. Rig gear for a minimalist overnighter or ditch the gym and opt for daily jaunts on the Jukdo for fitness and yoga—it can truly do it all. IST™ (Integrated Shaping Technology) uses multiple air chambers to create a unique shape, purpose-built for all-around paddling; the concave design uses three chambers to create concavity on the rails, which channels water back toward the fin for a cleaner flow of water and more efficient and quieter ride. Includes a high-pressure Super Pump II (with pressure gauge) one Touring fin, three All-Water fins, travel backpack and repair kit. Hand-shaped in Moscow, Idaho, USA.

Length: 304.8 cm/10'0" | Width: 78.74 cm/31" | Thickness: 12.7cm/5" | Weight: 9.5 kg/21 lb | Volume: 234 L/51.47 G | Max. Cap.: 86.2 kg/190 lb | Material: PVC . Z/Blend woven polyester drop-stitch core | Sizes: Jukdo 100 . Jukdo 108 . Jukdo 110

INDIANA - RESCUE 11'6

Designed by Lionel Spengler, the 11'6 Rescue Board caters specifically to lifeguards. Engineered for speed and efficiency, the Rescue SUP features seven handles strategically placed for successful operations in rivers, lakes, or the sea. Its double-layer construction ensures durability, and its versatile design allows for use with or without a middle fin, adapting to different settings seamlessly.

Length: 350 cm/11'6" | Width: 76.2 cm/30" | Thickness: 12 cm/4.75" | Volume: 243 L | Weight: 11.5 kg/25 lb | Material: Real Double Layer | Pad: Crocodile Groove

INDIANA-PADDLESURF.CH/EN

INDIANA - 10'2 RIVER INFLATABLE

The bigger of the two River SUPs is suitable for wild waters and longer tours on rivers. Thanks to the baggage cord with six attachments, your outdoor equipment can be fastened on the 10'2 River SUP without problems. The shape impresses with a functional outline where the widest point of the SUP is behind the middle. The special volume distribution, in combination with a progressive rocker line on the front and the rear end, makes the board very agile and allows precise steering. The length is ideal for beginners and heavy paddlers. The distribution of the volume ensures stability and keeps the board on track when passing through rapids. With an additional PVC strengthening on the rear end, the construction with a Woven Real Double Layer leaves no room for desires when it comes to stiffness, durability and weight.

Length: 311 cm/10'2" | Width: 86.4 cm/34" | Thickness: 15 cm/6" | Material: Woven Real Double Layer

COASTO - NAUTILUS

The Nautilus is a high-performance stand-up paddleboard specially designed for touring. Its dimensions, thickness, volume and constructed Drop Stitch Thermo Twin Skin technology makes it incredibly robust while environmentally friendly. The TTS technology eliminates the use of glue in the PVC construction of the board and makes the Nautilus up to 30% lighter than standard board models. Featuring a thick and grippy pad and three fins for optimal comfort and excellent directional stability, the Nautilus is suitable for beginners to advanced paddlers, and is classified as a high-performance touring board. It comes with accessories, including a wheeled transport bag, a double-action pump, an adjustable three-section paddle, a removable center fin, a safety leash, a repair kit, and a footrest. The board has a 2-in-1 central handle, double-loading elastics, and is compatible with the SUP kayak option. Furthermore, it features a bumper at the front and a GoPro mount.

Length: 355 cm/11'8" | Width: 86 cm/34" | Thickness: 15 cm/6" | Max. Cap.: 160 kg/352 lb | Material: PVC | Technology: Drop-Stitch | Colors: Orange . Blue . White

SIC - TAO FIT 11'0 AT

The TAO Fit is about stability, durability, and versatility. Whether paddling in slop and boat chop or taking a board down a section of fast water, the hybrid hull offers a unique keeled nose for cutting through chop and softening the ride while giving the board excellent tracking characteristics. The keeled nose transitions to a flat profile through the middle of the board, giving it outstanding stability. The flat deck offers the perfect platform for those looking for a board for a yoga class or the angler who wants to land the big one. A flat deck is also the perfect surface to keep your cooler or take your child or dog for a ride.

Length: 335 cm/11'0 | Width: 86 cm/33.8" | Weight: 16 kg/35 lb | Max Cap.: 130 kg/286 lb

INFLATABLE

THESE BOARDS WILL GET YOU FROM A TO B, WHETHER YOU'RE INTO SERIOUS RACING, FITNESS, CROSS TRAINING OR SIMPLY WANT GREAT GLIDE AND EASE OF PADDLING.

NRS - CLIPPER 110W

The Clipper SUP Board is a premium touring board featuring a deliberately shaped nose and tail rocker to balance tracking and maneuverability. Whether you're challenging headwinds on the Great Lakes or crushing river miles to make camp, the Clipper handles touring and overnight adventures with ease. Lighter and stiffer, thanks to our Z/Blend Core™ woven drop stitch technology. Innovative IST™ (Integrated Shaping Technology) uses multiple air chambers to create a unique shape, purpose-built for touring and added security on remote waters. The V-Hull design uses IST to add a V shape to the board nose for enhanced speed and tracking when touring, while the DropDeck™ enhances stability.

Length: 335.28 cm/11'0" | Width: 78.74 cm/31" | Weight: 10.25 kg/22.6 lb | Volume: 216 L/47.5 G | Max. Cap.: 97.5 kg/215 lb | Thickness: 12.7 cm/5" | Material: PVC outer . Z/Blend woven polyester drop-stitch core | Sizes: Clipper 110 . Clipper 110w . Clipper 126 . Clipper 126w

[NRS.COM](https://www.nrs.com)

NRS - TOUR-LITE 126

The Tour-Lite SUP Board is for paddlers who crave freedom to roam, glide, tracking and efficiency. With two sizes, the Tour-Lite 110 and 126, and a perfect shape for fitness training or overnight touring. The Bravo inflation/deflation valve allows the deflated board to roll tighter and pack smaller for maximum portability, while a streamlined design cuts costs, prioritizing stiffness and performance with our Z/Blend™ Core construction. Includes a high-pressure Super Pump II (with pressure gauge) one Touring fin, travel backpack and repair kit. Hand shaped in Moscow, Idaho.

Length: 381 cm/12'5" | Width: 81.28 cm/32" | Thickness: 15.24 cm/6" | Weight: 7.5 kg/16.6 lb | Volume: 348 L/76.55 G | Max. Cap.: 113.4 kg/250 lb | Material: PVC . Z/Blend woven polyester drop-stitch core | Sizes: Tour-Lite 110 . Tour-Lite 126

SIC - RS AIR

The RS Air's refined outline and welded seams make it the best displacement-shaped, all-water, multidiscipline inflatable for fitness, touring, and race.

Length: 427 cm/14'0" | Width: 75 cm/28" | Volume: 350 L/92.5 G

[SICMAUI.COM](https://www.sicmaui.com)

SIC - OKEANOS AIR 12'6

The Okeanos Air is geared up for on-the-road adventures, mirroring the dimensions and key features of its composite counterpart. It boasts numerous tie-down locations in the nose and tail for easy gear hauling and ample volume to accommodate a wide range of paddlers. The Okeanos can be customized with either a single center fin or two additional side fins to enhance stability and tracking. For shallow, fast, and white water, you have the option to remove the center fin and paddle with side fins only. Additionally, the side fins create a stable platform for beaching your gear-loaded board.

Length: 365 cm/12'6" | Width: 78 cm/29" | Weight: 12.2 kg/26 lb | Max. Cap.: 115 kg/253 lb | Sizes: Okeanos Air 12'6 . Okeanos Air 14'0

[SICMAUI.COM](https://www.sicmaui.com)

AQUA MARINA - HYPER

Adventure knows no boundaries with our HYPER inflatable SUP. With its sleek, modern silhouette and generous volume, you'll not only find excellent cruising efficiency and straight-line tracking, but also superior loading capacity to transport all your gear. Perfect for multi-day trips or when you're looking to explore greater distances, the HYPER is enjoyable for both first-timers and seasoned paddlers alike. HYPER models are equipped with rectangular hydrodynamic rail edges (REC Edge™) for clean water release and a FORE KEEL™ design for improved water stroke and straight-line tracking.

Length: 381 cm/12'6" | Width: 81 cm/32" | Weight: 12.5 kg/27.61 lb | Max. Cap.: 170 kg/374 lb | Material: PVC . Drop-stitch Core | Colors: Grey . Blue

AQUA MARINA - CORAL TOURING

The CORAL TOURING board offers a unique cruising shape ideal for all trekking enthusiasts. Effortlessly cover greater distances with exceptional glide and maneuverability. This lighter-weight touring board is perfect for calmer waters or mild waves while remaining ultra-portable. Its sleek outline features a moderate nose rocker for better control and effortless paddling. Coming in at just 9.3 kg, this board is easy to pack up into its convenient backpack to discover your next wondrous destination.

Length: 350 cm/11'6" | Width: 79 cm/31" | Weight: 9.3 kg/20.5 lb | Max. Cap.: 130 kg/286 lb | Material: PVC . Drop-stitch Core | Colors: Purple

AQUAMARINA.COM

MINT LAMA - SUPREME 11'6"

The MINT LAMA SUPreme 11'6" delivers an impressive and dynamic ride with high speed. This tilt-stable board ensures a smooth, clean, and effortless paddling experience. Boasting a high-quality set and a cool design featuring an elegant pinline, our SUPreme 11'6" is highly desirable. Crafted with Fusion Technology (MSL) and incorporating the new X-crossed weave (Woven Dropstitch), this board achieves remarkable lightness while the X-structure enhances its strength. The board's edges are triple-reinforced to prevent quick damage. The Crocodile Skin-structured EVA pad adds comfort. The package includes a high-quality backpack with wheels, a 100% carbon paddle, a double-lift pump with high volume (2.6 L), a US box fin, a leash, and a repair kit. It also comes equipped with a sports camera mount (M8 thread), side paddle mount, and kicker.

Length: 350 cm/11'6" | Width: 79 cm/31" | Weight: 7.9 kg /17.5 lb | Max. Cap.: 270 kg/595 lb | Material: Double Layer PVC . Woven Drop-stitch . Fusion Technology (MSL) | Colors: Wood look . White fish scales

INDIANA - 12'6" OCEAN TOURING INFLATABLE

If you want to SUP in the wind and waves on the lakes or outside in the open sea, the Indiana 12'6" Ocean Touring Inflatable is the right board under your feet. It has a pronounced scoop rocker line, which allows you to take advantage of the wave thrust on a downwinder without a nose dive. The fast outline with a width of 30 inches gives the board enough stability to stay in balance even during long sessions. Thanks to the woven Pre-Laminated Double-Layer Dropstitch, it is very light and yet robust and stiff. The fiberglass foot bases in the stand area create a hardboard feeling.

Length: 381 cm/12'6" | Width: 76.2 cm/30" | Thickness: 15 cm/6" | Materials: Woven Drop-stitch . PVC | Construction: Pre-Laminated Double Layer

INDIANA-PADDLESURF.CH/EN

INDIANA - 12'6" S TOURING INFLATABLE

The Indiana 12'6" S Touring Inflatable is the faster and sportier version of the 12'6" Touring. At 29 inches wide, it is a full two inches narrower. The pointed nose and the flat shape allow a very brisk pace on tours. Thanks to the woven Pre-Laminated Double-Layer Dropstitch, it is very light and yet robust and stiff. The fiberglass foot bases in the stand area create a hardboard feeling. Supercool! Split Fin Box, Straight Shape, 8.5 Hyperflow Fin, Speed Tail, Fiberglass Footbases, Shoulder Strap, Cam Connector. Incl. Wheelie Bag, HP8 Double Action Pump, Repair Kit.

Length: 381 cm/12'6" | Width: 73.7 cm/29" | Thickness: 15 cm/6" | Material: Woven Drop-stitch . PVC | Construction: Pre-Laminated Double Layer

HARDBOARD

THESE BOARDS WILL GET YOU FROM A TO B, WHETHER YOU'RE INTO SERIOUS RACING, FITNESS, CROSS TRAINING OR SIMPLY WANT GREAT GLIDE AND EASE OF PADDLING.

INDIANA - 14'0 DHC RACE DUGOUT HOLLOW CARBON 21.5"

The new Dugout Hollow Carbon Raceboard. Only 21.5" narrow, it guarantees a lot of speed. Due to the low standing position in the dugout and the high, steep rails, the board by shaper Andi Widmann is still very stable. The nose scoop is so high that the narrow nose flies freely over the chop and cuts through the waves as soft as butter even in difficult conditions. The middle area is gently rocked through, which means that the wetted area can be reduced as much as possible. The slightly monoconcave, parallel channel in the underwater hull ensures reduced frictional resistance and optimized directional stability. The tail kick prevents the tail from being sucked in, it also enables tight buoy turns and guarantees the best downwind properties in rougher conditions. The square detail with sharp edges up to the fin ensures a perfect tear-off of the water.

Length: 426.7 cm/14'0 | Width: 54.6 cm/21.5" | Material: Carbon . Airex Foam | Construction: Hollow Carbon

INDIANA-PADDLESURF.CH/EN

INDIANA - 12'6 TOURING S CARBON/WOOD 27.5"

This 12'6 meets all the demands of a touring board. The shape makes it fast, but still stable. The all-around carbon fabric makes the board robust and light. Thanks to the Paulownia wood veneer on deck, it becomes a feast for the eyes.

Length: 381 cm/12'6 | Weight: 12.2 kg/26.9 lb | Fin: 8.5" Hyperflow Carbon Race Fin

INDIANA-PADDLESURF.CH/EN

SIC - BULLET DF

The Bullet is not only a tremendous downwind board. It's designed to be a versatile touring board that can drop-in and surf swell as well as beach and point breaks.

Length: 381 cm/12'6 | Width: 72.4 cm/28.5" | Volume: 266 L/70.3 G | Material: DF

SICMAUI.COM

SIC - RS

The RS is fast in flat and all-water conditions, helping you reach your top-end speed. It's the most trusted performing race board on the market.

Length: 427 cm/14'0 | Width: 58.4 cm/23" | Volume: 350 L/92.5 G

SICMAUI.COM

SIC - OKEANOS 14'0

The Okeanos is a fitness and touring board that has won awards such as the SUPConnect "Best Touring Board" and "Best Overall Board." This touring and fitness board paddles with ease and maintains a fast and efficient glide. The nose chine in the bow helps to soften the ride in rough waters and tracks extremely well under power in wind and cross-chop. The generous tail width and full, squared-up rails help make this board very stable. The wide point in the board's front section has shifted forward, adding to the overall stability. The board has also been outfitted with numerous tie-downs to mount your cargo. It is super stable rail-to-rail making this a great board to fish off.

Length: 426 cm/14'0 | Width: 71 cm/27.9" | Weight: 14.6 kg/32 lb | Max Cap.: 125 kg/275 lb

WHITEWATER BOARDS

BOARDS CREATED FOR CHALLENGE OF PADDLING WHITEWATER. THOSE BOARDS ARE STRONGER AND WIDER, DESIGNED TO CRUISE OVER CURRENTS AND EDDIES.

NRS - CLEAN 96

The Clean SUP Board turns clean-line dreams into a reality. Featuring a significant continuous tail and nose rocker, the Clean transforms rapids into a paddling playground. Downriver paddlers can choose between two sizes—a shorter playful board or the Clean 11, intended for multiday adventures. Woven drop stitch Z/Blend Core™ inflates to 20 PSI for unmatched rigidity. The DropDeck™ enhances stability by raising the deck rails to maintain volume and dropping the deck to lower the paddler's center of gravity. Double sidewalls and concave design uses three chambers to create concavity on the rails, which channels water back toward the fin for a cleaner flow of water and more efficient and quieter ride.

Length: 289.56 cm/9'5" | Width: 91.44 cm/36" | Thickness: 12.7cm/5" | Weight: 10.4kg/23 lb | Volume: 251 L/55.21 G | Max. Cap.: 95.24 kg/210 lb | Material: PVC . Z/Blend woven polyester drop-stitch core | Sizes: Clean 96 . Clean 110

[NRS.COM](https://www.nrs.com)

LEVEL SIX - RIVER SURFER

While we built the River Surfer Inflatable SUP with river waves in mind, it can be used in the ocean too. While you'll never get the same performance as an epoxy board carving on a wave due to the rail shape, we made the board as thin as possible without sacrificing stiffness. The carbon laminated sidewalls, raised deck pad and quad fin set up will let you surf any wave small or large.

Length: 259 cm/8'6" | Width: 83.8 cm/33" | Thickness: 11.9 cm/4.6" | Max. Cap.: 104.3 kg/230 lb | Material: Mono layer fusion drop-stitch | Colors: Aegean Blue

[LEVELSIX.EU](https://www.levelsix.eu)

LEVEL SIX - RIVER RUNNER

Our River Runner Inflatable SUP was designed and tested on the mighty Ottawa River which means it is destined for big waves, strong eddy lines, and boofing over holes. We used our HD dual-layer drop-stitch construction for long-term durability, so it can take the abuse of the river dishes out. With a substantial progressive rocker, raised sidewalls and a tri-fin setup it'll be a great board for experienced whitewater SUPers on challenging water and first-timers looking to give it a try.

Length: 294.6 cm/9'8" | Width: 88.9 cm/35" | Thickness: 15 cm/6" | Weight: 9.3 kg/20.5 lb | Max. Cap.: 122.5 kg/270 lb | Material: Dual layer drop-stitch with reinforced sidewalls | Colors: Aegean Blue

[LEVELSIXEU](https://www.levelsix.eu)

INDIANA - 10'2 RIVER INFLATABLE

The bigger of the two River SUPs is suitable for wild waters and longer tours on rivers. Thanks to the baggage cord with six attachments, your outdoor equipment can be fastened on the 10'2 River SUP without problems. The shape impresses with a functional outline where the widest point of the SUP is behind the middle. The special volume distribution, in combination with a progressive rocker line on the front and the rear end makes the board very agile and allows precise steering. The length is ideal for beginners and heavy paddlers. The distribution of the volume ensures stability and keeps the board on track when passing through rapids. With an additional PVC strengthening on the rear end, the construction with Woven Real Double Layer leaves no room for desires when it comes to stiffness, durability and weight.

Length: 350 cm/11'6" | Width: 76.2 cm/30" | Thickness: 15 cm/6" | Material: Woven Drop-stitch . PVC

[INDIANA-PADDLESURF.CH/EN](https://www.indiana-paddlesurf.ch/en)

AQUA MARINA - RAPID

With glide for beginner paddlers cruising streams and stability for experienced riders challenging boiling whitewater, the 2022 RAPID is all about versatility in wild water. An ample nose and a curved rocker line give this robust board extraordinary responsiveness in whitewater rapids or when surfing river waves. The generous volume, combined with a width of 33", provides ultimate stability. Bonus: the newly-designed ARCH EDGE™ system enables riders to focus on river paddling without looking down and prevents their back foot from slipping off when applying tail pressure. Constructed in Aqua Marina's Double Layer Technology, this board is lightweight without sacrificing rigidity.

Length: 289 cm/9'6" | Width: 84 cm/33" | Thickness: 15 cm/6"

WING BOARDS

BOARDS SPECIFICALLY SHAPED WITH WING USE IN MIND.

INDIANA - 10'6 WING ALLROUND INFLATABLE

The 10'6 Wind & Wing Allround Board impresses with its huge area of applications. The board works with an inflatable wing for SUP winging. In light winds, the two side fins, which can be attached to the Air7 Click-fin boxes, help to maintain the height. In stronger winds, the 9" all-round fin is enough to stay on track and the very long silicone tear-off edge helps to achieve the necessary speed. Of course, you can also use the board as an all-around SUP and even ride moderate waves with it. The right choice for the active family or as an all-in-one board for the camper inventory.

Length: 320 cm/10'6 | Width: 81.3 cm/32" | Thickness: 12 cm/4.75" | Volume: 243 L | Weight: 11.5 kg/25 lb

INDIANA-PADDLESURF.CH/EN

F2 - SUP GLIDE SURF + GLIDE ALLROUND WING

The F2 GLIDE ALLROUND WING provides entirely new experiences while offering an easy entry into familiar (SUP) terrain. It is lightweight, features viewing windows, and is intuitive to operate. With four available sizes, it caters to every weight and skill level. Additionally, its usability in minimal wind makes the F2 GLIDE ALLROUND an ideal family companion and a must-have in any SUP equipment. The inflatable F2 GLIDE SUP Surf comes with a windsurfing option, aligning seamlessly with our new WINGS both aesthetically and technically.

Length: 329 cm/10'8 | Width: 82 cm/32" | Feature: 3x center fin/ slot box | In the box: 1x bag . 1x pump . 1x paddle . 1x repair kit | Wing: Sizes: 3,0m² . 4,0m² . 5,0m² . 6,0m² | Color: Black . Grey

SICMAUI.COM

SIC - RAPTOR PRO

The low-volume RAPTOR PRO 4'11 performance wing foil board is perfect for free riding and chasing speed. Minimal thickness allows for more direct control, while the flat bottom chine provides a smooth lift-off and better glide.

Length: 125 cm/4'11" | Width: 55 cm/22" | Volume: 60 L/15.8 G | Material: SFX

SICMAUI.COM

TAHE - TECHNO WIND FOIL 130

The Techno Wind Foil 130 is the ideal board for experiencing and enjoying freeride and foil-board riding. Designed to excel at both at a high level, it enables you to sail in much lighter winds and to get maximum fun in the widest range of conditions possible. It's a «convertible» package that will please riders who want the best of both, light-wind foil riding and strong-wind fun.

Length: 230 cm/7'5" | Width: 81.5 cm/30" | Volume: 130 L/34.3 G | Material: Ace-Tec

TAHESPORT.COM

INDIANA - 3'7 PUMP FOIL "LE DOIGT" CARBON LTD

Indiana Ambassador Steeve Fleury has redesigned his signature pumpfoil board. It is dedicated to pure pumping and dock start foiling. This pumping machine is small, compact, light and strong. The shape of this board allows you to get the longest fly and to carve like hell. The rails are round on the top and sharp on the bottom. When you turn too tight or touch the water they keep the glide, don't slow your speed and allow you to re-takeoff easily. With this 24 L board, you can even paddle and catch waves. The new clean tail-shape and concave rails make this board extremely efficient and allow it to recover instantly from touchdowns. This board is the best compromise between weight, strength and volume to give you the maximum performance you need in a pumping session.

Length: 109 cm/3'7" | Width: 47.3 cm/18.6" | Thickness: 6.1 cm/2.4" | Material: EPS Foam . Carbon . Fiberglass . Epoxy | Construction: Carbon Fiberglass Sandwich

INDIANA-PADDLESURF.CH/EN

INDIANA - FREEWAVE 85 L

Unveiling the Wingfoil Freewave Board for 2024, currently available in 85 L, it stands as the epitome of modern design from the ingenious mind of our designer, Gunnar "Chinatown" Biniasch. Meticulously tested and refined, this board embodies harmony in every detail. Noteworthy features include Release Rocker 2.0 for optimal acceleration and seamless water release, a Deep Concave Deck ensuring maximum control and comfort, and Concave Rails enabling dual functionality for enhanced roll stability and efficient board release. The Round Bottom Hull accelerates in displacement mode, offering increased speed, and is gentler on knees during landings and chop. The HSH (Hard-Soft-Hard) Rail Progression optimizes water entry, ensuring efficiency and channeling water under the board. Gunnar's craftsmanship makes the Wingfoil Freewave Board a pioneering force in the world of wingfoiling.

Length: 157.5 cm/5'2" | Width: 62.2 cm/24.5" | Thickness: 12.9 cm/5.1" | Volume: 85 L | Weight: 6 kg/13.2 lb | Materials: EPS Foam . Carbon . Fiberglass . PVC

INDIANA-PADDLESURF.CH/EN

INDIANA - PUMP FOIL 95 CARBON 2024

The Third generation of Indiana Pumpfoil boards are the next evolution in design and will take your Pumpfoiling to the next level. The slim outline, concave deck, progressive beveled rails and Rounded "V" Bottom provide a progressive heel-to-toe performance with effortless turning response and unrivaled touchdown recovery. The Pumpfoil 95 is aimed at Intermediate to advanced-level riders who want the shortest possible board.

Length: 95 cm/3.1' | Width: 46 cm/18" | Thickness: 2.8 cm/1.10" | Material: PVC Foam . Carbon . Epoxy | Construction: PVC Foam . Carbon

INDIANA-PADDLESURF.CH/EN

INDIANA - DOWNWIND SUP FOIL 7'6

The Indiana Downwind/Flatwater Foil Boards are meticulously designed to optimize maximum glide and early release. Crafted by our shaper, Gunnar Biniashch, these boards seamlessly integrate elements from surf, wind, and kite-foil designs, along with features inspired by SUP Race boards. The result is a unique bottom shape tailored specifically for downwind SUP Foiling. The concave rails tapering to the tail create a dual-functionality: first, a thin keel in the tail for an early glide and easy water release, and second, a wider deck section above the keel providing stability for paddling in calm water and navigating through bumps. The round bottom underneath the front foot ensures an instantaneous release from the water, enabling quick acceleration. The narrow outline and small width contribute to effortless water cutting, facilitating smooth acceleration for an unparalleled downwind foil experience.

Length: 228.6 cm/7'6 | Width: 50.8 cm/20" | Thickness: 14.3 cm/5 5/8" | Volume: 112.5 L/29.7 G | Weight: 8.4 kg/18.5 lb

INDIANA-PADDLESURF.CH/EN

INDIANA - WINGFOIL 135 L

Designed by Andi Widman to be the ultimate Flat Water/Lake Board. The 135 L is perfect for beginners and heavy riders. The early planning hull shape gets you going early. The narrow shape and recessed deck limit your foot placement to the center of the board to make going straight very easy.

Length: 188 cm/6'2 | Width: 75.5 cm/30.5" | Thickness: 12.4 cm/4.7" | Material: EPS Foam . Carbon . Fiberglass . Epoxy | Construction: CarbonFiberglass Sandwich

INDIANA-PADDLESURF.CH/EN

INDIANA - WAVE 4'4

Engineered to excel in both winged and wingless wave scenarios, Gunnar dedicated extensive time to testing and refining the concepts for this versatile board. The Release Rocker 2.0 maximizes acceleration and ensures a resistance-free water release. The Deep Concave Deck, with an ergonomic design, provides superior control, locking in the front foot comfortably. Concave Rails introduce a dual-board concept, enhancing roll stability during displacement and aiding board release while pumping. The Round Bottom Hull accelerates in displacement mode, offering increased initial speed and a softer landing experience. The HSH (Hard-Soft-Hard) Rail Progression optimizes water entry, ensuring efficiency and effective water channeling under the board.

Length: 132.7 cm/4'4 | Width: 47 cm/18.5" | Thickness: 8.3 cm/3.3" | Volume: 36 L/9.5 G | Material: EPS Foam . Carbon . Fiberglass . Epoxy | Construction: Carbon Fiberglass Sandwich

INDIANA-PADDLESURF.CH/EN

INDIANA - G-PRO 63 L

Gunnar went all out to create his ultimate performance board. The idea was to have the advantages of a short 4'4" board but with enough volume to still be easy to take off on. To achieve this the 63 L has a lot of thickness in the center, with the volume kept low out by the rails using a progressive concave rail. The concave rails also keep the bottom of the tail very thin which allows you to carve the board as hard as you want without the tail touching the water. The teardrop outline keeps the volume under the front foot, making it not only easy to kneel on when doing water starts when winging, but it makes it very easy to paddle and pop up on waves when surf foiling. Surf foiling? You heard right, this board was also designed to work as a surf foil board. The compact shape makes it amazing to surf foil and pump.

Length: 132.1 cm/4'4 | Width: 55.9 cm/22" | Thickness: 12.7 cm/5" | Volume: 64 L | Weight: 5 kg/11 lb | Material: EPS Foam . Carbon . Fiberglass . Epoxy | Construction: Carbon-PVC-fiberglass sandwich (top) . Carbon-fiberglass sandwich (bottom)

INFLATABLE

INFLATABLE FOIL BOARDS FOR EASIER STORAGE AND TRANSPORTATION.

TAHE - ARIA 5'8 AT

The ARIA 5'8 stands as one of the most thrilling additions to our wing foil range, proudly manufactured in France at our production site in Vannes—a groundbreaking achievement. This new shape marks an entry point for wing foilers seeking a rigid board at an affordable price. Crafted with durable yet lightweight ACE-TEC technology, this board is a testament to our 40 years of experience in windsurfing. Its shape has undergone rigorous testing and challenges by our team in various conditions throughout Brittany, France, ensuring performance and reliability.

Length: 152.4 cm/5'8 | Width: 71 cm/28" | Weight: 7.9 kg/17.4 lb | Max. Cap.: 110 kg/242 lb

[TAHESPORT.COM](https://www.tahesport.com)

TAHE - ARIA 5'11 AIR

The Aria Air is the ideal inflatable board for learning and progressing WingFoiling. The carbon fiber mounting plate under the foot pad is ultra-rigid and helps guarantee performance similar to rigid boards. Compact, and easy to store.

Length: 180 cm/5'9 | Width: 72 cm/28" | Volume: 130 L/34 G | Material: Drop-Stitch

[TAHESPORT.COM](https://www.tahesport.com)

AZTRON - FALCON AIR X 5'10 WING FOIL BOARD

The FALCON AIR X 5'10" is a compact version of a wing foil-specific board offering an easier entry to the world of the foiling industry. Lightweight and compact, this board is responsive and easy to handle. Thanks to its extra wide deck surface, it gives great volume and makes the release easier during take-off and touch-down. Equipped with our Double Chamber construction, it delivers maximum performance, making it an ideal board for riders who are just starting to venture into the world of foiling.

Length: 178 cm/5'10 | Width: 73 cm/29" | Volume: 135 L | Thickness: 12 cm/4.75" | Weight: 7 kg/15.4 lb | Max.Cap.: 100 kg/200 lb

[AZTRONSPORTS.COM](https://www.aztronsports.com)

INDIANA - WING FOIL 149 L INFLATABLE

With the 149 L SUP / Wingfoil Inflatable developed by foil expert Gunnar Biniash, even heavier foilers can fly, with a paddle or with a wing. It is almost indestructible and ideal for traveling. Its construction with woven real double layer, the fiberglass compression belts and the thickness of 6" make it extremely stiff and direct. The reinforcement of the boxes prevents the board from sagging before the foil. The V-footstraps can be installed optionally. The handle on the nose helps to get the board through the shore break successfully. All Wingfoil boards feature lightweight M6 Footstrap Inserts for V-Straps for Winging. The new corrugated pad is designed for maximum comfort and lateral grip whilst allowing you to easily move your feet forward and backward when trimming the board in flight.

Length: 182 cm/6'0 | Width: 71 cm/28" | Thickness: 15 cm/6" | Material: Woven Drop-stitch . PVC | Construction: Real Double Layer . Top & Bottom: Fiberglass Stringer
